

G-CRHD-94BZ

G-CRHD-94BZ is a type of dense chrome brick, which is added coarse aggregates. It is produced by using carefully selected high-purity electro-fused chromium raw materials with isostatic pressing. This refractory shows excellent corrosion resistance and spalling resistance, and is suitable for the throats, doghouse corner, dam wall and etc.

Chemical composition(%)

	Cr ₂ O ₃	ZrO ₂
G-CRHD-94BZ	94	1.4

The above are typical properties (Not to be considered as contractual specifications).
Please refer user instruction and/or SDS (Safety data sheet) before using.
